

# NGUYEN NGOC NHAT

## AI ENGINEER

+84 962288718 | ngocnhatforwork@gmail.com | <https://nhatngocnguyen.github.io/>

---

### SUMMARY

---

Passionate about Deep Learning. Eager to research and develop projects that apply knowledge to create innovative solutions in a dynamic, forward-thinking environment.

### PROFESSIONAL EXPERIENCE

---

- |                                                                                                                                                                                                                                           |                            |

| <ul style="list-style-type: none"><li>Building and deploying machine learning pipelines and models on Google Cloud Platform</li></ul>                                                                                                     |                            |
| <b>Backend &amp; AI Engineer, Nobisoft</b>                                                                                                                                                                                                | <b>Jul 2024 - Sep 2025</b> |
| <ul style="list-style-type: none"><li>Developed and deployed RAG-based AI features for internal tools and customer-facing apps</li><li>Built and maintained RESTful APIs, integrated AI models with production back-end systems</li></ul> |                            |
| <b>Research Assistant, PTIT NITS Lab</b>                                                                                                                                                                                                  | <b>Aug 2024 - Present</b>  |
| <ul style="list-style-type: none"><li>Supported research projects focused on deep learning models and their real-world applications</li></ul>                                                                                             |                            |

### PROJECTS

---

#### Real-time Sign Language Recognition

Built a system translating ASL gestures into sentences for non-signers

- Utilized MediaPipe and OpenCV for real-time landmark detection
- Trained and deployed LSTM and MLP models for gesture and letter recognition
- Designed a Seq2Seq model to convert gesture sequences into coherent English sentences
- Optimized the system for real-time performance and high classification accuracy

#### Many-to-Many Machine Translation Representation Steering through Multi-Pivot Prompting

- Propose a Multi-pivot translation framework and a lightweight representation steering method that significantly improve many-to-many machine translation quality while minimizing inference overhead
- Submitted to *EACL 2027 (Rank A)*

#### VIVID: A Culturally Grounded Benchmark Exposing the Figurative Language Gap in Vietnamese NLP

- Conducting a research paper exploring factuality in Vietnamese culture to demonstrate how large language models (LLMs) may misrepresent culturally specific facts and nuances
- Accepted at *LREC 2026 (Rank B)*

### EDUCATION

---

- |                                                                                                                                  |                           |
|----------------------------------------------------------------------------------------------------------------------------------|---------------------------|
| <b>Bachelor of Engineering in Information Technology</b>                                                                         | <b>Oct 2022 - Present</b> |
| Posts and Telecommunications Institute of Technology                                                                             |                           |
| <ul style="list-style-type: none"><li>GPA: 3.63/4.00</li><li>Awarded scholarship for 5 out of 9 academic terms to date</li></ul> |                           |

### SKILL

---

- Programming Languages:** NodeJS, Python
- Frameworks and libraries:** NestJS, Pytorch, FastAPI, LangChain, LiteLLM
- Databases:** SQL Server, MongoDB, PostgreSQL, MySQL, Qdrant, ChromaDB, BigQuery
- Tools:** Docker, Git/GitHub, GCP
- Certificate:** 7.5 IELTS
